

#### **4) Huck Proteomics and Mass Spectrometry Core Facility**

Equipment and Research Support Services

003 Althouse – University Park

Tatiana Laremore, (814) 863-3503, TNL1@psu.edu

The Proteomics and Mass Spectrometry Core Facility provides a range of MS-based analytical services, including nominal and accurate mass determination, MS characterization of biological molecules, protein identification, protein expression and modification analysis. The Facility offers experiment design consultations, hands-on training on protein sample preparation techniques, and provides access to the gel electrophoresis equipment.
